

# Technical Information

## DORUS KS 350

### EVA Hotmelt Adhesive for Edgebanding Unfilled

#### Characteristics

- Medium viscosity
- Universal hotmelt adhesive
- Very clean working
- Produces tight joints virtually not visible
- Very high heat resistance
- High glue mileage
- Very good wetting
- Permits smooth surfaces even with very flexible edging materials

#### Fields of application

- Edgebanding as from feedrates of 15 m/min
- Edging material: veneer, melamine, polyester, HPL\*, PVC\*, ABS\*, PP\*  
*\*Suitability depends on the individual characteristics of the edging material and how it is primed.*
- Softforming even with difficult-to-bond profiles
- Suitable for processing centres (BAZ) with direct application

#### Technical data

Softening point (Ring & Ball):	approx. 125 °C (257 °F)
Viscosity (Brookfield):	approx. 175 000 mPa·s / 180 °C (356 °F) approx. 90 000 mPa·s / 200 °C (392 °F)
Heat resistance:	approx. 100 °C (212 °F)

*tested with 0.6 mm oak veneer using the DORUS method of increasing temperature*

#### Instructions for use

Recommended working temperature	
in the melting container:	190 - 210 °C (374 - 410 °F)
at the application roller:	190 - 210 °C (374 - 410 °F)

#### Colour available

Transparent, white

#### Delivery form

Granules

#### Storage

Shelf life of at least 1 year if stored in a cool and dry place.

#### Labelling

Hazardous warning labelling according to GefStoffV and EU Directives not required.

## Safety

Hotmelt adhesives give off vapours even when the specified working temperature is not exceeded. The smells emitted may often cause irritation. When the specified temperatures are considerably exceeded over a longer period of time, there is the additional danger of decomposition products being given off. Therefore measures to draw off the vapours need to be taken, e.g. through the provision of extraction equipment.
