

Lithium Ion Battery Instructions

830.18.003

To charge:

1. The battery must be in the ON Position when charging. The battery will not charge otherwise. On is indicated when the LED on switch is illuminated red with nothing plugged into the battery.
2. Plug the adapter into the wall and the DC barrel connector into the battery.
3. The light on the battery will be red when the battery is charging. The red light will not go off., however the battery has circuitry to prevent over-charging, over discharging and short circuit.

Depending on battery drain the charge time can take up to 8 hours depending on how depleted the battery is.

CAUTION

Only use the provided adapter to charge the battery, item 830.18.002.

Keep away from high temperature and store in a cool dry location.

Do not attempt to open, disassemble or service battery pack.

Do not strike, throw or crush the battery.

Do not dispose of in fire or water.

May explode if damaged or exposed to fire.
