Features
Bumper provides extra silencing during drawer closure

The Accuride load ratings shown below represent a wide range of typical applications and take into consideration factors which can adversely affect the performance of a slide.

In general, slides installed in drawers that are wider than they are deep, are subject to lateral (side) stresses that reduce their load carrying capacity. Likewise, slides in applications that are cycled frequently also carry a lower load rating.
Please use the following information to determine the load rating of model 9301 as it pertains to its intended application.

150-Ib. [68 kg.] load rating
Load rating is based on an 18 " [ 457.2 mm ] slide in a 32 " [ 812.8 mm ] wide drawer, cycled 10,000 times. Use anywhere side space is limited.

CAUTION: $\quad$ This slide must never be used as a pull-out step, platform or any other application supporting human weight as injury may result.

* Available on 9301-48, 54 and 9301-60 only.
** Available on 9301-60 only

Note: Maximum screw head of .190 " [ 4.8 mm ] high by $.500^{\prime \prime}$ [ 12.7 mm ] diameter necessary to clear traversing members. Exception to this rule applies for $1 / 4$ " [M6 Euro] carriage bolts.

## Side Mounting

To install the cabinet (outer) member, first fully extend the slides to provide access to the mounting holes. Be sure slides are parallel. Insert the $1 / 4$ " head-hex or pan head screws (M6 Euro) through the horizontal slots.

Attach the drawer to the extended inner members with $1 / 4$ " hex-head or pan head screws (M6 Euro) inserted through the vertical slots. Leave all screws loose for final adjustment. Adjust slide positions until movement is smooth. Then tighten all screws; if necessary, use more screws to secure slides and complete installation. See Figure 1.

## Flat Mounting

Position the large (outer) members on the cabinet floor as shown in Figure 2. Align slides flush to the edge of the drawer bottom. Be sure slides are parallel. Fully extende the slides to provide access to the mounting holes. Insert the $1 / 4$ " hex-head or pan head screws (M6 Euro) through the horizontal slots.

Install the $1 / 4$ " hex-head or pan head screws (M6 Euro) through the vertical slots in the drawer (inner) member into the bottom of the drawer. Leave all screws loose for final adjustment. Adjust slide positions until movement is smooth. Then tighten all screws; if necessary, use more screws to secure slides and complete installation.

## Carriage Bolt Mounting Considerations

When using carriage bolts, the squared neck of the bolt will extend beyond the thickness of the cabinet member. Therefore, carriage bolts must be used with mounting surfaces that allow for the insertion of the protruding neck of the bolt (i.e. aluminum or wood). Otherwise, the mounting surface must have a hole to provide clearance for the protruding neck. This is required to fasten the slides securely to the cabinet. See Figure 5, for the minimum dimensions required for the clearance hole.

Carriage bolts may be used to secure the cabinet member only; carriage bolt mounting holes are not available on the drawer member. Be aware that when using carriage bolt mounting holes, the adjacent holes will become unavailable for mounting.

Note: Platform bracket kits are not compatible with the carriage bolt mounting method.

## Side Mounting (Carriage Bolt)

To install the cabinet member (outer) member, first fully extend the slides to provide access to mounting holes. Be sure slides are parallel. Insert the carriage bolts (customer-supplied) through the diamond or square shaped holes. The diamond-shaped holes accomodate \#10 type carriage bolt; the square holes accommodate ¼" (M6 Euro) type carriage bolt. See Figure A.

Attach the drawer to the extended inner members with $1 / 4$ " hex-head or pan head screws (M6 Euro). Leave all screws loose for final adjustment. Adjust slide positions until movement is smooth. Then tighten all screws and nuts; if necessary, use more screws to secure slides and complete installation. See Figure 3.

## Flat Mounting (Carriage Bolt)

Position the large (outer) members on the cabinet floor as shown in Figure 4. Align slides flush to the edge of the drawer bottom. Be sure slides are parallel. Insert the carriage bolts (customer-supplied) through the diamond or square shaped holes. The diamond-shaped holes accommodate \#10 type carriage bolt; the square holes accommodate $1 / 4^{\prime \prime}$ (M6 Euro) type carriage bolts. See Figure A.

Install the $1 / 4$ " hex-head or pan head screws (M6 Euro) through the vertical slots in the drawer (inner) members into the bottom of the drawer. Leave all screws loose for final adjustment. Adjust slide position until movement is smooth. Then tighten all screws and nuts; use more screws to secure slides and complete installation.

## Optional Platform Bracket Kits

Brackets provide four bottom-mount and two side-mount options. For bottom-mount, one bracket attaches to the slide outer member and the cabinet base. The other bracket attaches to the slide inner member and the platform or tray. For side-mount, the bracket attaches to the slide inner member. See Figure 6 for examples of both mounting options. When the brackets are used either individually or in combination, they will accommodate all slide lengths. Each kit contains two brackets, four $1 / 4$ " hex-head screws, and four $1 / 4$ " hex nuts with lock washers. See separate platform bracket data sheet for more information.
