

**J CHANNEL**  
**300.5108.MAL/WH**

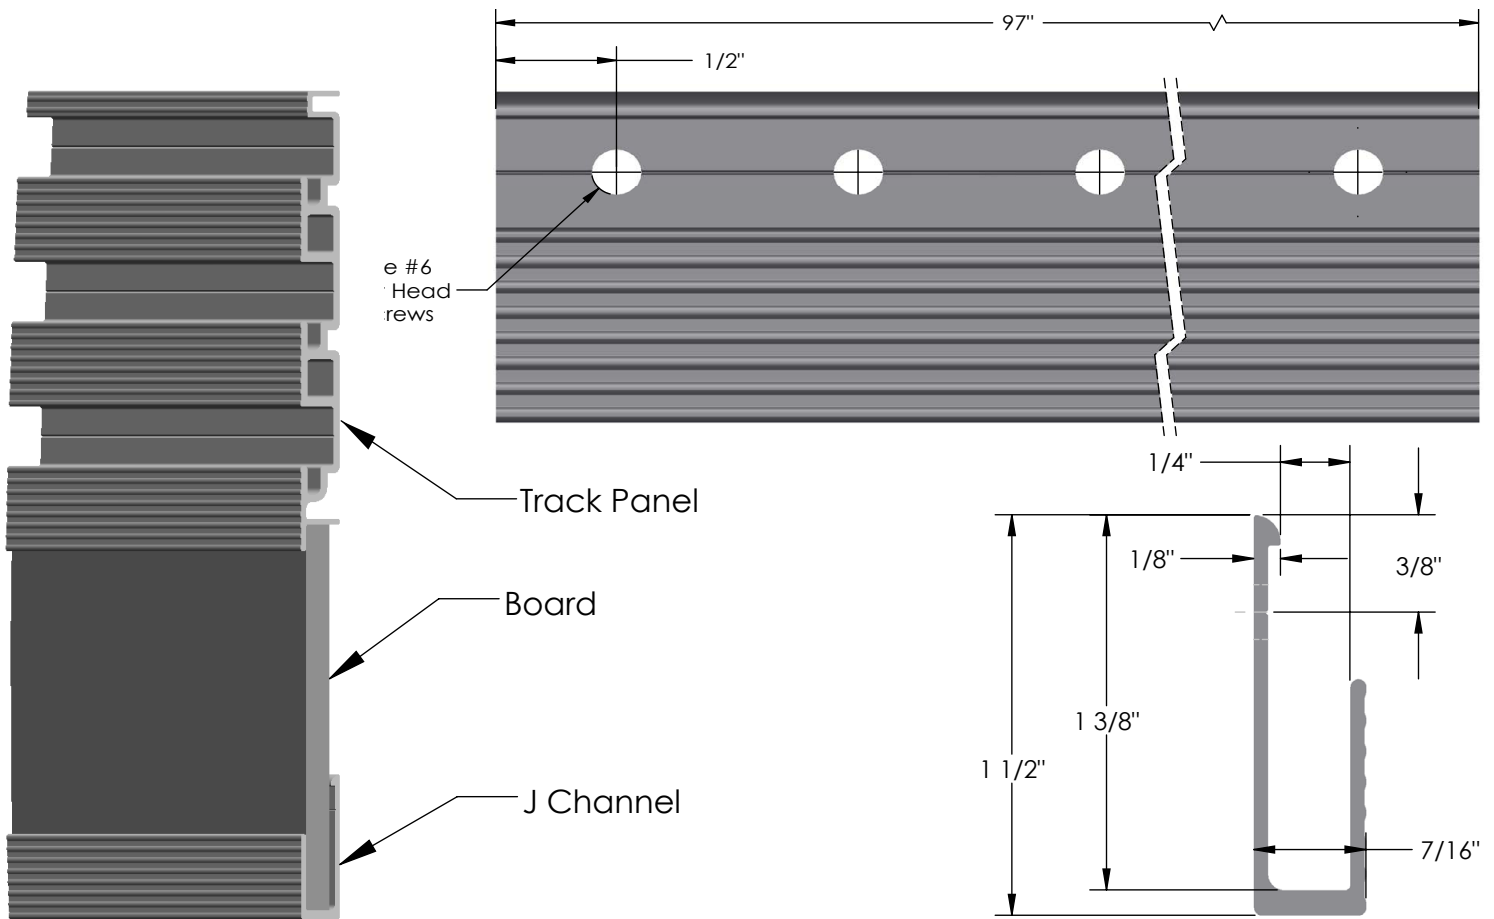

**DESCRIPTION & SPECIFICATIONS**

The J Channel is used to hold a section of board, white board, cork board, or other materials underneath a length of track panel. Can be cut to suit.

SIZE & CAPACITY | 96"

AVAILABLE FINISHES |  

Matte Aluminum, White.

**INSTRUCTIONS & SPECIFICATIONS**

STEP 1: Install the J Channel at the desired height below where the track panel will be installed.

STEP 2: Place board in the J Channel and secure it into place by inserting the top of the board into the bottom channel on the track panel and installing the panel.

- Use #6 Flat Head Screws to install.
